## Review Report

The article "Successful Off -Pump Coronary Artery by Pass Surgery in a Patient with Myelodysplastic Syndrome Refractory Anemia with Ring Sideroblasts (Mds Rars) - A Rare Case Report" is interesting case report because it very rare that the patient has coronaryartery disease and also myelodysplastic syndrome.

## Title and abstract

The title and abstract are adequate of the entire paper.

## Introduction

The introduction gives a clear background to the reported series and the following discussion. Some language corrections are needed.

The case report is very good described, I suggest only to write which inotropic agents are used in postoperative period.

## Discussion

The discussion is valid, and credible. The literature is well selected, and matched, and finally well discussed.

## Conclusions

The conclusion is very good written.

## References

The references are adequate to the subject, although it should be checked again.
