Investigations could be more in detail with regard to:

- Include the routine biochemical and hematological parameters
- Include the follow up and how the steroids were tapered

What rheumatological tests were done?

What is the importance of cortical hypometabolism on PET?

Include the clinical photographs and videos (if possible) for review

Mark the figures in the text and add legends for the same

I have read this submission. I believe that I have an appropriate level of expertise to confirm that it is of an acceptable scientific standard, however I have significant reservations, as outlined above.
