Review Report

1. Material an methods need to be more clear and to provide more information about the children enrolled in the study such as their ages, sex,.....etc.
2. Authors need to provide more information about on all tools they used and explain why they used them?
3. Did authors use sampling techniques for selecting enrolled children and teachers?
4. Provide detailed information about Likert Scale. also, is it validated or not?
5. All abbreviations should be written complete on the first time they appear in the text.
6. Why did authors selected 2nd to 4th grade children? Can they understand the educational materials concerning air pollution?
7. All results should be statistically tested for significance to proof significance
8. Table 1: Kindly abbreviate TOT?
9. I did not find any discussion. All results could be analysed and discussed in reference to other studies done on the same subject of the current work

I have read this submission. I believe that I have an appropriate level of expertise to confirm that it is of an acceptable scientific standard, however I have significant reservations, as outlined above.
