Article Title: Expression of Somatic Multiple Drug Resistance Genes, *mdr1a* and *mdr1b*, is Increased with the Progression of Tuberculous Inflammation in Mice

Reviewer: Gloria M Molina-Salinas, Instituto Mexicano del Seguro Social, Mexico

Submission Date: August 08, 2017

Review Status: Revision Required

How to Cite this Report: Gloria M Molina-Salinas. Review Report for: Expression of Somatic Multiple Drug Resistance Genes, *mdr1a* and *mdr1b*, is Increased with the Progression of Tuberculous Inflammation in Mice [Version 1, Awaiting Peer Review]. *Insights Tuberc.* (2017) 1: 3.1

Review Report

- The document does not show the word Introduction, that start with: The problem of drug resistance is one.
- Some mistakes in use of abbreviation of name of bacterium and italic style, i.e. *Mycobacterium tuberculosis, in vivo*.
- Please review the spelling and English language of some phrases.

I have read this submission. I believe that I have an appropriate level of expertise to confirm that it is of an acceptable scientific standard, however I have significant reservations, as outlined above.
